

Please add claims 35-42.

Sub 71  
35. A method of prevention and treatment of asthma, which comprises instructing a patient to inhale an effective amount of a composition comprising, in admixture:

- (a) a first active ingredient which is formoterol, a pharmaceutically acceptable salt or solvate thereof or a solvate of such a salt; and
- (b) a second active ingredient which is budesonide;  
characterized in that the patient is instructed to inhale the composition on demand, as determined by the patient based on the patient's symptoms, as a complement to maintenance treatment of the patient's asthma.

Sub 71  
36. A method of prevention and treatment of asthma, which comprises instructing a patient to inhale an effective amount of a composition comprising, in admixture:

- (a) a first active ingredient which is formoterol, a pharmaceutically acceptable salt or solvate thereof or a solvate of such a salt; and
- (b) a second active ingredient which is budesonide;  
characterized in that the patient is instructed to inhale the composition on demand, as determined by the patient, when the patient is expecting to encounter an asthma trigger, as a preventative measure.

37. The method of claim 13 further comprising instructing the patient to inhale the composition daily as a maintenance treatment.

Sub 71  
38. The method of claim 13 further comprising instructing the patient to use the composition as a complement to maintenance treatment of the patient's asthma.

39. The method of claim 35 further comprising instructing the patient to inhale the composition daily as the maintenance treatment.

40. The method of claim 36 further comprising instructing the patient to inhale the composition on demand as a rescue medicine.

41. The method of claim 36 further comprising instructing the patient to inhale the composition daily as a maintenance treatment.

42. A method of prevention and treatment of asthma, which comprises instructing a patient to inhale an effective amount of a composition comprising, in admixture:

(a) a first active ingredient which is formoterol, a pharmaceutically acceptable salt or solvate thereof or a solvate of such a salt; and

(b) a second active ingredient which is budesonide;  
characterized in that the patient is instructed to take a maintenance dose of the composition, and, if the patient experiences asthma symptoms, to inhale additional doses as needed to improve control and provide acute relief.--
